## The commitments of Socomec to respect the environment

150 14025

> As part of its environmental policy, Socomec is committed to:

- Develop innovating solutions primarily focused on energy efficiency to help its customer in the design of less energyconsuming, better managed and ecofriendly installations.
- Diversify its product offer in the renewable energy and energy efficiency sectors,
- Minimize the environmental impact of its industrial activities through the progressive ISO 14001 certification of its production sites,
- Minimize at the preliminary design stage the environmental impacts of its products taking into account their whole life cycle,
- Provide his customers with reliable data on the environmental performance of the products.

## Product information

#### **Reference product**

The representative product is the DIRIS B-10 with sales reference 48290010

#### **Functional unit**

To monitor energy consumption and numerous electrical parameters to optimize the performance of the electrical installation during 10 years.

## Material and substances

#### Declaration of the constitutive materials according to IEC 62474

Total mass of the reference product (including packaging): 0,263 kg (packaging: 0,066 kg and electronic components: 0,101 kg)

The packaging is composed of : 2 identification stickers, 1 cardboard box, 1 bottom of the crate, 1 cap

#### For the Diris B-10

Metals, 21,2% weight		Plastics, 36,7% weight		Others, 42,1% weight		
Copper and its alloys	14,5%	Others Thermoplastics	30,4%	Other Organic Materials	29,6%	
Other non-ferrous metals and alloys	2,9%	Other Plastics and Rubber	6,3%	Ceramics / Glass	6,3%	
Other Ferrous alloys, non- stainless steels	2,1%			Other inorganic materials	6,2%	
Nickel and its alloys	1,2%					
Zinc and its alloys	0,5%					
Precious Metals	0,1%					
Aluminum and its alloys	<0,1%					

The estimated content of recycled materials is 47,7 %, based on a Life Cycle Analysis model with EIME software.

#### Substances management

Socomec is leading a program to limit the use of hazardous substances in the design of new products and to monitor the presence of substances of concern in its supplies to anticipate future use restrictions.

Directive 2011/65/EU : Product references covered by this PEP meet the requirements of the RoHS Directive on the restriction of substances such as lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyl (PBB), polybrominated diphenyl ethers (PBDEs) and phthalates (DIBP, DEHP, BBP, DBP).

To the best of our knowledge, based on the supplier declarations, at the publication date of this document, the product do not contain any other SVHC in a concentration above 0,1% per weight.

## Manufacturing

The products covered by this PEP are manufactured on the production site of Benfeld whose environmental management system has been ISO 14001 certified. Impacts on the environment are reduced by optimizing its energy consumption and by practicing a rigorous waste management

The products covered by this PEP are manufactured on a site where impacts on the environment are reduced by optimizing its energy consumption and by practicing a rigorous waste management.

Moreover, Socomec is committed to the progressive ISO 14001 certification of its manufacturing sites.

## Distribution

As part of its distribution policy aiming to respect the environment, Socomec is in favor of groupage transports and ISO14001 certified logistic partners.

No reconditionning is needed for this product.

The packaging complies with Directive 94/62/EC.

The sizing of the packaging has been optimized to ensure the best possible protection of the product at the lowest possible volume in order to reduce the impact of the transport stage on the environment.

Packaging design solutions favors mono-material recyclable cardboard without coloring or bleaching. The wedging of the packaged product is made of recycled cardboard, no polystyrene is used.

## Installation

The installation stage consists in connecting the product to the existing electrical installation. The installation does not generate any significant impacts on the environment, except impacts from packaging waste.

## Use phase

#### **Consumption scenario**

Use phase scenario: European energy mix

Mode	Power consumption of the reference product (W)	Load rate (%)	Time distribution (%)
Active	2	100%	100%

Product power consumption during its total lifespan (10 years): 175,2 kWh

#### Care and maintenance

The product does not require any maintenance under normal conditions of use.

### Consumables

The product does not require consumables.

## End of life

## End of life treatment

The following parts require specific care and selective treatment in accordance with Annex VII of the WEEE Directive 2012/19/EU - Waste of electrical and electronic equipment. Maintenance and disassembly should always be conducted by qualified personnel.

Type of component	ltem	Part mass	Location
Necessity of a selective treatment	РСВ	g	0

0

### Recovery potential of the product according to IEC TR 62635

The total potential value of this product is 23,2 %. This potential value takes into account the material recycling and energy recovery.

## Environmental impacts

## Calculation methodology: life cycle assessment (LCA)

The calculation of the impacts on the environment was made using a life cycle assessment methodology in accordance with the ISO 14040 requirements and with PEP eco passport product category rules. For more details follow the link: <u>www.pep-ecopassport.org</u> This study was carried out with the version 5.9.3 of the software EIME with version database CODDE-2020-12. The software is distributed by CODDE which is a subsidiary of Bureau Veritas.

The whole life cycle has been taken into account:

Step	Geographical representativeness	Scenario		
Manufacturing (M)	Production of electronic components : Asia Production of other components and packaging : Europe Assembly : France	From the raw material extraction to the last Socomec logistic platform, including packaging Waste generated during manufacturing phase are taken into account.		
Distribution (D)	Distribution scenario : Europe	From the last Socomec logistic platform to the final customer. No product reconditioning.		
Installation (I)	Transport and treatment of packaging wastes : Local	Local road transport of 1000 km of generated wastes to the treatment site, and landfilling		
Use phase (U)	Energy mix : Europe	Power consumption required during 15 years and maintenance according to consumption scenario described on page 3.		
End Of Life (EOL)	Transport and treatment : Local	Road transport of 1000 km from the final customer to the treatment sites. End of life treatment.		

#### **Environmental impacts of the Diris B-10**

The following impacts have been calculated to best represent geographically and technologically each step of the life cycle.
