

Enclosed switches

from 20 to 1600 A

When **energy** matters

 **socomec**
Innovative Power Solutions

Enclosed switches and safety enclosures

Active in the electrical switchgear market since 1922, Socomec is both a global leader and an undisputed benchmark reference.

Our enclosed solutions, with or without fuse protection, are suitable for a wide variety of commercial and industrial power distribution operating environments and applications. From 20 to 1600 A, to IEC or UL standard, we now have one of the widest ranges on the market.

Safe

Clear indication of the switch position.
Triple padlocking in the off position for safe isolation.
Secures transfer for mechanical or electrical work.

Reliable

Proven switchgear technology for load break switches and fuse switches.
Robust mechanism and external handle.

Standard

Socomec enclosed switches conform to the European Directive on Low Voltage and the Machine directive.
They meet the requirements of product standards IEC 60947-3 and -6 and assembly standards IEC 61439-1 and -2.

Easy installation

Cables feed through pre-cut holes at the top or bottom, to save time during cabling.
Generous cabling space to allow termination of larger cables.

Extensive range

Wide range of ratings (20 to 1600 A), switch types and enclosure materials (polycarbonate, polyester, painted steel, stainless steel) to suit every application.

Why do you need an enclosed switch?

Switchgear systems are an essential part of your electrical system. Present at all levels of your electrical distribution, they allow you to **secure** and **isolate** parts of the network or specific electrical equipment.

Installed near a motor or machine, they are used to ensure both an emergency stop function and for isolation during cleaning, maintenance and inspection. Enclosed switches protect the user against the accidental starting of electrical machines.

Make it safe to work, whatever your line of business

Optimise and safeguard operation

Local enclosed load break switches improve the availability of equipment by reducing downtime and making it safe to carry out work on the production tool.

Tough in extreme environments

Choose the right enclosure for the site conditions to ensure the availability and durability of the switching function.

Guaranteeing a higher level of safety

Enclosed switches used close machines guarantee the **safety of people** and **property** while respecting European standards and guidelines.

Main features

Which product for which business?

Rating	Polycarbonate 20 - 125 A	Polyester 160 - 630 A	Painted steel 20 - 1600 A	Stainless steel 32 - 100 A
Application				
Cement industry		••	•••	
Metal industry		••	•••	
Food industry	•	••		•••
Tunnels	•••	••	•
